

SAID DAWOOD

SOFTWARE ENGINEER

www.dawoodshahat.tech

WORK EXPERIENCE

Full Stack Javascript Developer (PERN, MERN)

SPQR OPERATIONS B.V | Dec 2020 - Current

- Responsible for implementing high-fidelity designs into functional apps.
- Helped new hires in the onboarding process.
- Maintained and implemented internal UI components' library

Software Engineering, Intern

S&P Global | Jun 2019 - Aug 2019

- Implemented a full stack web application for sharing, filtering and downloading code snippets. That would eventually help the internal teams to work on the new framework they were migrating to.
- Automated functional tests of Restful web services.
- Automated UI functional tests.

SOFTWARE PROJECTS

Boddy (boddy.travel)

- Converted high fidelity design into a fully functional React application
- Implemented theming for each partner

Lalaaji (A B2B Marketplace focused on Pakistan Sellers)

- Implemented the Seller Dashboard
- Implemented the Chat Application for connecting buyers and sellers

DatisFlex (A platform for connecting clients and freelancers)

- Converted high fidelity design into a fully functional React application

Write Ideas App

- Developed Web application that uses ReactJS, NodeJS, MongoDB and ExpressJS to share your writings and makes you stick to it
- Designed Restful API that enables the writings to be stored persistently in a NoSQL database called mongoDB.
- Integrated PassportJS to add signup/login functionality to the application.
